

Secure technology

giving you remote control over your monitored sites

Our commitment to innovation and developing market-leading technological solutions, means we provide our customers with security monitoring services which improve performance and allow installers to provide the best service possible.

Why TOUCH?

TOUCH offers you flexible access to control your monitored alarm systems.

Innovation at your fingertips

Designed to give you the ultimate in mobility, visibility and efficiency. TOUCH allows you to view your alarm systems online, make keyholder changes, view event history and generate key reports.

Value Added Benefits

- Access on the go from any internet ready device - irrespective of your location
- Clean and simple navigation
- Make last minute keyholder, authorised user and password changes without having to call your alarm company
- See the latest actions taken by the Alarm Receiving Centre in real-time following your activation
- Enjoy full remote access, for complete peace of mind

Get started...

- Go to [TOUCH.estate](https://touch.estate)
- Complete registration details
- Expect email with acceptance details
- Ready for live access at your fingertips
